   Figure (Switch power off)

---

**Method of usage**

4. **Calf installation**

- Install the rotating shaft in calf, fixed axis first, make sure the hole is aligned, so that the R shape pin assembly (chart 1)
- After calf is connected with the fixed axis aligned, then insert (chart 2)

![chart1](chart1)

- Plug R pin, then move to the other side of the calf, and the plug R pin (chart 3)
- Finished (chart 4)

![chart2](chart2)

**Note**

- When the machine under the working state, with lying and calf rest lifting, you could not apply gravity on the calf, to prevent the massage chair does harm to people before dumping(chart1).
- Ensure the mechanism hands not in the seat part, otherwise will cause uncomfortable in the Buttock when you seating in the chair(chart2).
Method of usage

5. Head cushions and backrest pad’s dismounting and use manual
- The head cushion has three fold-down layers. The users can choose the number of layers to find the best intensity of back massage.
- Separate the head pillow to reduce the intensity of the back massage.
- Backrest cushion and backrest connected by zipper (1), head cushion and backrest pad connected by thread gluing (2)

6. Floor Protection
- It is recommended to not place the massage chair directly on wooden floors to prevent damage to the floor, please place a carpet or rug under the chair.

Caution: Do not move the chairs with its wheels on the wood floor, rough ground or in a narrow space. Two people are required to lift the chair. While lifting, take the calf sealing board and backrest cover grooves as the focal point (Please do not lift armrest Directly.)

Method of usage

7. Method of movement
- Make sure that all wires are far above the ground, tilt the backrest backwards (with the gravity center resting on the wheels), push the chair forward or backward with your hands and bring back the chair to the normal position in a slow and gentle manner.

Note: During movement you must turn off the power switch first and then unplug the power line and hand controller cord.
